Subject: Many thanks from Marianne

Dear Apollo:

I need to tell you how incredibly useful your GIS site is for our research team, here at [XXXXX](#) in Scottsdale, AZ. The Montgomery site is state-of-the-art!

And I know whereof I speak: We research ownership and sales comparisons on multi-housing properties all over the US. Many times, the address listed in the assessor's records is not publicized. When that happens, the only way we can find the assessor record is to locate the parcel first! Using the "Identify" function, I click on the parcel I think is the right property, and it brings up all of the assessor data. This is a miracle, believe me!

I have used about fifteen different GIS sites, so far. Montgomery's is one of the better ones. I know you are continuing to refine the site, all the time, so that it will run better and faster, all the time. Please keep up this good work! It's one of the few things in this world that truly is making life better!

Best regards, and thanks, again!

Marianne F
